

Small Bore & Gas Seals

Gas Seals or Obturator discs' give a gas sealing property similar to a plastic wad powder cup. Designed primarily to be used under felt or fibre wads to make them more ballistically efficient. They are made in 2 forms, white for plastic cases, and green for paper cases. Available in 10ga 7 mm thick, 12ga 5 mm & 6.5 mm thick, and 20ga 5 mm thick only. In certain applications obturators can be used under some plastic wads to increase the column height, particularly with steel shot wads.

10ga 7 mm 12ga 5 mm 20ga 5 mm

GAS101 10gs Gas seals £12.00/500,
GAS122 12ga 6.5mm Gas seals £10.00/1000,
GAS123 12ga 5.0mm Gas seals £8.50/1000
GAS201 20ga Gas seals £8.00/1000. dc. £4.85 each bag

Air Wedge
8.2mm

GS2 & Stackable Gas Seals

GS2 & Stackable gas seals are ideal for adjusting the the wad column height when loading steel shot or when using a long case with a light load. Stackable's fit into the powder cup of a plastic wad, and the GS2's fit under the powder cup, both maintain maximum velocity for any given shot load.

GAS124 Stackable Gas Seals £15.00/250
GAS125 GS2 £11.75/250 dc. £3.25

28 GAUGE

H30 H37 H38 H41

For the **28 gauge** reloader we now have three types of plastic wad for the 70 mm case and one fibre type. G-H38A will hold 17/18 grams of Lead shot, H37B. 22/24gr, H41. 27/28gr. All are green in colour with a secondary gas sealing ring around the base of the shot cup to help prevent leakage just in case the powder cup was damaged in loading.

WAD281 28g H38A wad £11.50/500
WAD282 28g H30 wad £11.00/500
WAD284 28g H37B wad £11.00/500
WAD282 28g H41 wad £12.50/500
WAD283 28g 8mm Lubricated Fibre £15.50/500
WAD286 28g 12mm Waxed Felt wads £19.00/250
WAD287 28ga 15mm Waxed Cork Wad £14.50/500
dc £6.75 per bag

32 & 24 Gauge

24 gauge

32 gauge

Gualandi 32ga H37 and 24ga H38 wads are stocked in small quantities due to their limited demand. The 32ga wad is reversible having an open powder cup shot cup arrangement, and the 24ga has a single ended Mini-Container. Both are made to fit 65 mm PT cases and have compression columns for flexibility of shot loads. They also include a secondary central gas seal.

WAD321 32g H37G-Mini Container
£10.00/250 dc £5.25
WAD241 24ga H38 G-Mini Container
£10.00/500 dc. £6.90

.410 gauge

Three types of .410 plastic wads are currently available and one wax coated cork. The Gualandi Micro H17 holding 19 grams of lead shot in a 76 mm PT case. Two Mini-Container H27 holds 14gr in a 65 mm case and H33 14gr in 76mm, and the H40 with full length petals 16 gram in the 76 mm PT cases. Full length petals are to help reduce leading of the barrel walls. H40's are not recommended for guns fitted with a silencer. The wax coated cork wad is 15 mm in height and capped both ends. It can be placed directly on the powder, but can also be used with an over-powder card if required.
